MAKING STRIDES AGAINST BREAST CANCER

Almost everyone has been touched by breast cancer in some way. Breast cancer is the most commonly diagnosed cancer in women in the US (excluding skin cancer) and is second only to lung cancer as a cause of cancer death in women.

The American Cancer Society Making Strides Against Breast Cancer walk unites communities to support each other. We honor those touched by the disease by raising awareness and funds to fight for a world without breast cancer.

Each year, more than one million passionate participants support our noncompetitive three- to five-mile walks, which are held in more than 250 communities nationwide.

WHY WALK WITH US?

In 2017, **252,700** women are expected to be newly diagnosed with breast cancer in the US.

Breast cancer is the second-leading cause of cancer death in women.

THE DOLLARS YOU RAISE HELP MAKE A DIFFERENCE.

\$25 could help provide a wig to a patient in treatment.

\$50 could help provide patients and caregivers with free lodging when they have to travel for cancer treatment.

\$100 could help one woman attend a workshop to feel more empowered and confident in dealing with appearance-related side effects from treatment.

Sign up today.
